Theorem: (Birbrair, F., Neumann 2008)

Let  $(X, \mathbf{0})$  be a weighted homogeneous complex isolated singularity in  $\mathbb{C}^3$ . If the weights of  $(X, \mathbf{0})$  are ordered by  $w_1 \ge w_2 \ge w_3$ , then

$$rac{w_2}{w_3} \leq \lambda(X, \mathbf{0}) \leq rac{w_1}{w_3}$$

Example

Let X and Y be the weighted homogeneous algebraic surfaces in  $\mathbb{C}^3$  given below:

$$X: x^2 + y^{51} + z^{102} = 0$$
 and  $Y: x^{12} + y^{15} + z^{20} = 0$ .

Then,  $(X, \mathbf{0})$  and  $(Y, \mathbf{0})$  are homeomorphic but they are not inner bi-Lipschitz homeomorphic.

200

Theorem: (Birbrair, F., Neumann 2008)

Let  $(X, \mathbf{0})$  be a weighted homogeneous complex isolated singularity in  $\mathbb{C}^3$ . If the weights of  $(X, \mathbf{0})$  are ordered by  $w_1 \ge w_2 \ge w_3$ , then

$$rac{w_2}{w_3} \leq \lambda(X, \mathbf{0}) \leq rac{w_1}{w_3}$$

Example

Let X and Y be the weighted homogeneous algebraic surfaces in  $\mathbb{C}^3$  given below:

$$X: x^2 + y^{51} + z^{102} = 0$$
 and  $Y: x^{12} + y^{15} + z^{20} = 0$ .

Then,  $(X, \mathbf{0})$  and  $(Y, \mathbf{0})$  are homeomorphic but they are not inner bi-Lipschitz homeomorphic.

The links of  $(X, \mathbf{0})$  and  $(Y, \mathbf{0})$  are orientable 3-dimensional manifolds which are circle bundle over a orientable surface of genus g = 25 and both have Euler Class equal to 1.

Alexandre Fernandes UFC
