

Index alphabétique des tomes XLI–L (1983–1990)

L. A. Aizenberg (Л. А. Айзенберг)

1. Применение многомерного логарифмического вычета к теории чисел. Интегральная формула для разности между числом целых точек в области и её объёмом 46 (1985) 395–401

M. Albert

1. (and J. A. Baker) Functions with bounded n th differences 43 (1983) 93–103

B. Alfawicka

1. Inverse problems connected with periods oscillation described by $\ddot{x} + g(x) = 0$ 44 (1984) 297–308

R. I. Alidema (Р. И. Алидема)

1. Investigation of system of differential equations with three intersecting lines of discontinuity (Исследование системы дифференциальных уравнений с тремя пересекающимися линиями разрыва) 47 (1986) 89–98

J. Aragona

1. (and J. F. Colombeau) The interpolation theorem for holomorphic generalized functions 49 (1988) 151–156

A. Azzam

1. On the Dirichlet problem for linear elliptic equations in plane domains with corners 43 (1983) 43–50

D. D. Bainov

1. (and G. Hristova) Bounded solutions of systems of differential equations with impulses 48 (1988) 191–206
2. (and P. S. Simeonov) Интегральные дифференциальные неравенства для одного класса кусочно-непрерывных функций 48 (1988) 207–216
3. (and P. S. Simeonov) On an integral inequality for piecewise continuous functions 49 (1988) 253–258

J. A. Baker

1. (and M. Albert) Functions with bounded n th difference 43 (1983) 93–103

M. Baran

1. Siciak's extremal function of convex sets in C^N 48 (1988) 275–280

K. Baron

1. On approximate solutions of a system of functional equations 43 (1983) 305-316

B. Basit

1. (and M. Emam) Differences of functions in locally convex spaces and applications to almost periodic and almost automorphic functions 41 (1983) 193-201

W. C. Bauldry

1. (and W. A. Kosmala) On positive solutions of equations with two middle terms 50 (1990) 241-250

E. Bedford

1. Envelope of Dirichlet problems on a domain in $\mathbb{C}^n$ 46 (1985) 13-18

P. R. Beesack

1. Iterated and double limits 47 (1986) 51-64

P. Besala

1. Comparison theorems for purely non-linear parabolic differential operators 42 (1983) 5-15
2. Finite difference approximation to the Cauchy problem for non-linear parabolic differential equations 46 (1985) 19-26

J. Bęczek

1. On the existence of solutions of some non-linear Dirichlet problems 49 (1988) 45-51

R. Bharati

1. (and K. S. Padmanabhan) On a subclass of univalent functions I 43 (1983) 57-64
2. (and K. S. Padmanabhan) On a subclass of univalent functions II 43 (1983) 73-76

S. Bhargava

1. (and S. Nanjunda Rao) Convexity of a class of functions related to classes of spirallike functions and functions with boundary rotation 49 (1988) 229-235

J. Bochenek

1. Positive solution of asymptotically linear elliptic eigenvalue problems for certain differential equations of the fourth order 45 (1985) 231-236
2. Existence of a minimal solution and maximal solution of a nonlinear elliptic boundary value problem of the fourth order 46 (1985) 27-34
3. On some linear eigenvalue problems for strongly elliptic systems with an indefinite weight matrix function 50 (1989) 27-35

Z. Bogucki

1. (et J. Zderkiewicz) Sur la courbure des lignes de niveau dans la classe $S_{\alpha k}^c$ des fonctions convexes d'ordre α et k -symétriques 41 (1983) 37-42
2. (et J. Zderkiewicz) Remarques sur un problème de M. Biernacki relatif aux fonctions subordonnées dans le cas des majorantes convexes 45 (1985) 157-159

K. Borsuk

1. An alternative concept of the n -dimensional measure 42 (1983) 17-24

O. Borůvka

1. Sur une classe des groupes continus à un paramètre formés des fonctions réelles d'une variable 42 (1983) 25-35

A. Borzyskowski

1. (and J. Urbanowicz) Uniqueness of the solution of a tangential derivative problem for an infinite system of non-linear integro-differential equations of parabolic type 41 (1983) 99-109

B. Božek

1. Convergence and stability of difference scheme for an elliptic system of non-linear differential-functional equations with boundary conditions of Dirichlet type 44 (1984) 273-279
2. (and R. Mosurski) A difference scheme for an elliptic system of non-linear differential-functional equations with Dirichlet type boundary conditions. The existence and uniqueness of solution 44 (1984) 155-161

P. Brandi

1. (and R. Cappitelli) Existence, uniqueness and continuous dependence for a hereditary nonlinear functional partial differential equation of the first order 47 (1986) 121-136

I. Broszkiewicz

1. Decompositions of tensor products of contractions 48 (1988) 105-107

S. Brzywczy

1. Approximate iterative method and the existence of solutions of non-linear parabolic differential-functional equations 42 (1983) 37-43
2. Existence of solutions for non-linear systems of differential-functional equations of parabolic type in an arbitrary domain 47 (1987) 309-317

J. Burbea

1. Functional Banach spaces of holomorphic functions on Reinhardt domains 49 (1988) 179-208

R. Cappitelli

1. (and P. Brandi) Existence, uniqueness and continuous dependence for a hereditary nonlinear functional partial differential equation of the first order 47 (1986) 121-136

P. Caraman

1. Boundary behaviour of quasiconformal mappings in normed spaces 46 (1985) 35-54

M. Cecchi

1. (and M. Marini, P. L. Zezza) Boundary value problems on $[a, b]$ and singular perturbations 44 (1984) 73-80

U. Cegrell

1. Small sets in C^n 46 (1985) 55-60

J. Chabrowski

1. (and B. Thompson) On traces of solutions of a semi-linear partial differential equation of elliptic type 42 (1983) 45-71

K. Ciesielski

1. Continuity in semidynamical systems 46 (1985) 61-70

Z. Ciesielski

1. (and J. Domsta) The degenerate B -splines as a basis in the space of algebraic polynomials 46 (1985) 71-79

J. A. Cima

1. (and J. A. Pfaltzgraff) Holomorphic extension from the sphere to the ball in Hilbert space 43 (1983) 51-56

J. F. Colombeau

1. (and J. Aragona) The interpolation theorem for holomorphic generalized functions 49 (1988) 151-156

G. Conti

1. (and R. Iannacci) Some results on boundary value problems for multivalued differential equations 47 (1987) 319-329

K. Dankiewicz

1. On approximate solutions of a functional equation in the class of differentiable functions 49 (1988) 247-252

V. C. Dannon

1. (and A. G. Kartsatos) The controllability of a quasilinear functional differential system 47 (1987) 371-380

T. M. K. Davison

1. Restricted homogeneity implies bi-additivity 48 (1988) 121-125

A. L. Dawidowicz

1. On the existence of an invariant measure for the dynamical system generated by partial differential equation 41 (1983) 129-137
 2. (and K. Łoskot) Existence and uniqueness of solution of some integro-differential equation 47 (1986) 79-87
 3. (and A. Turski) A simple proof of a theorem on Markov operators 48 (1988) 65-70
 4. On the positivity of an invariant measure on open non-empty sets 50 (1989) 185-190
 5. On the random version of Ważewski theorem 50 (1990) 235-239

K. Dąbrowski

1. Kuranishi families for Hopf surfaces 45 (1985) 61-84

T. Dłotko

1. (and A. Lasota) On the Tjon-Wu representation of the Boltzmann equation 42 (1983) 73-82

2. Asymptotic behaviour of solutions of the nonlinear heat equations 48 (1988) 109–119
- J. Domsta**
1. (and Z. Ciesielski) The degenerate B -splines as a basis in the space of algebraic polynomials 46 (1985) 71–79
- O. Došlý**
1. On transformations of self-adjoint linear differential systems and their reciprocals 50 (1990) 223–234
- M. Downarowicz**
1. (and A. Janik) On the growth of entire functions of n complex variables 46 (1985) 81–84
- L. M. Drużkowski**
1. Extension of separately holomorphic functions defined in non-open sets in the infinite dimensional case 41 (1983) 157–165
2. (and K. Rusek) The formal inverse and the Jacobian Conjecture 46 (1985) 85–90
- I. A. Dzhrvarsheishvili (И. А. Джваршейшвили)**
1. On boundary properties of analytic functions (О граничных свойствах аналитических функций) 43 (1983) 1–11
- M. Emam**
1. (and B. Basit) Differences of functions in locally convex spaces and applications to almost periodic and almost automorphic functions 41 (1983) 193–201
- V. Faber**
1. (and J. Mycielski, P. Pedersen) On the shortest curve which meets all the lines which meet a circle 44 (1984) 249–266
- G. Fournier**
1. (and D. Violette) A fixed point theorem for a class of multivalued continuously differentiable maps 47 (1987) 381–402
- R. Fournier**
1. On neighbourhoods of univalent starlike functions 47 (1986) 189–202
- M. Frigon**
1. (and D. O'Regan) On a generalization of a theorem of S. Bernstein 48 (1988) 297–306
- A. Fryszkowski**
1. Existence of solutions of functional-differential inclusion in nonconvex case 45 (1985) 121–124
- J. Fuka**
1. On the continuity of Faber mapping 46 (1985) 91–103
- M. Furi**
1. (and P. Pera) A continuation method on locally convex spaces and applications to ordinary differential equations on noncompact intervals 47 (1987) 331–346

P. M. Gadea

1. (and E. Reyes, A. Montesinos) Projective torsion and curvature, axiom of planes and free mobility for almost-product manifolds 48 (1988) 307–330

Z. Gajda

1. Christensen measurability of polynomial functions and convex functions of higher orders 47 (1986) 25–40

A. Gamble

1. (and J. Janas) Some relations between Toeplitz and singular integral operators on odd spheres 41 (1983) 293–297

J. Gancarzewicz

1. Some vector subbundles of a cotangent bundle of order 2 43 (1983) 13–21
2. (et N. Rahmani) Relèvements horizontaux de tenseurs de type $(1,1)$ au fibré $E = TM \otimes T^*M$ 48 (1988) 281–289
3. (et N. Rahmani) Relèvement horizontal des connexions linéaires au fibré vectoriel associé avec le fibré principal des repères linéaires 48 (1988) 291–295

B. Gaveau

1. (and J. Kalina, J. Ławrynowicz, L. Wojtczak) The global Yang–Mills equations depending on an arbitrary metric 46 (1985) 105–114

M. Gera

1. (and M. Greguš) Some results in the theory of a third-order linear differential equation 42 (1983) 93–102

H. Goldmann

1. Finitely generated maximum modulus algebras 47 (1986) 149–153

J. Goncerzewicz

1. On a boundary value problem for an equation of the type of non-stationary filtration 43 (1983) 293–304

R. Gorenflo

1. Analysis of parabolic difference schemes by Gerschgorin's method 42 (1983) 83–91

A. Gregorczyk

1. (and J. Tabor) Monotonic solution of the translation equation 43 (1983) 235–260

M. Greguš

1. (and M. Gera) Some results in the theory of a third-order linear differential equation 42 (1983) 93–102

A. Grimaldi

1. (and F. Ragnedda) Characterization of the solutions of a $2b$ -parabolic operator with initial data in BMO 43 (1983) 211–223

R. Guzzardi

1. Non-linear eigenvalue problems and bifurcations for differentiable multivalued maps 45 (1985) 283–295

D. J. Hallenbeck

1. (and K. Tkaczyńska) Extreme points and support points of subordination families with p -valent majorants 50 (1989) 93–115

P. Hartman

1. On the monotonicity of nonnegative solutions and the uniqueness of eigenvalues 42 (1983) 103–113

H. Haruki

1. On a conformal-mapping property 44 (1984) 39–44
2. A functional equation arising from the Joukowski transformation 45 (1985) 185–191

S. Haruki

1. Four different unknown functions satisfying the triangle mean value property for harmonic polynomials. II 44 (1984) 239–243

W. Hejmo

1. (and J. Kłoch) On the perturbations in a time-optimal closed-loop system 50 (1989) 37–52

K. Horbacz

1. Dynamical systems with multiplicative perturbations 50 (1989) 11–26
2. Asymptotic stability of dynamical systems with multiplicative perturbations 50 (1990) 209–218

S. G. Hristova

1. (and D. D. Bainov) Bounded solutions of systems of differential equations with impulses 48 (1988) 191–206

R. Iannacci

1. (and G. Conti) Some results on boundary value problems for multivalued differential equations 47 (1987) 319–329

R. Ishimura

1. Endomorphismes de l'espace des germes de fonctions holomorphes en un point et opérateurs différentielles d'ordre infini 49 (1988) 129–133

M. Jabłoński

1. On invariant measures for piecewise C^2 -transformations of the n -dimensional cube 43 (1983) 185–195
2. The law of exponential decay for r -adic transformations 43 (1983) 197–205
3. On convergence of iterates of the Frobenius Perron operator for expanding mappings 48 (1988) 127–130

Z. Jackiewicz

1. (and M. Kwapisz) Convergence of multistep methods for Volterra integro-differential equations 43 (1983) 121–139

P. Jakóbczak

1. On the regularity of extension to strictly pseudoconvex domains of functions holomorphic in a submanifold in general position 42 (1983) 115-124
2. Extension and decomposition operators in products of strictly pseudoconvex sets 44 (1984) 219-237
3. The local boundary regularity of the solution of the $\bar{\partial}$ -equation 48 (1988) 71-90

Z. J. Jakubowski

1. (and H. Siejka, O. Tammi) On the maximum of $a_4 - 3a_2 a_3 + \mu a_2$ and some related functionals for bounded real univalent functions 46 (1985) 115-128

D. Jama

1. Asymptotic stability of integro-differential equation of parabolic type 47 (1986) 65-78

J. Janas

1. (and A. Gamble) Some relations between Toeplitz and singular integral operators on odd spheres 41 (1983) 293-297
2. Spectral properties of doubly commuting hyponormal operators 44 (1984) 185-195

A. Janik

1. (and M. Downarowicz) On the growth of entire functions of n complex variables 46 (1985) 81-84

T. Jankowski

1. Multistep methods for ordinary differential equations with parameters 50 (1989) 63-69

W. Jarczyk

1. On solutions of a certain functional-integral equation 44 (1984) 51-65
2. Generic properties of some iterative functional equations 47 (1987) 361-369

M. Jarnicki

1. Multiplicative linear functionals on some algebras of holomorphic functions with restricted growth 44 (1984) 353-361
2. (and P. Pflug) Non-extendable holomorphic functions of bounded growth in Reinhardt domains 46 (1985) 129-140
3. (and P. Pflug) Bergman completeness of complete circular domains 50 (1989) 219-222

M. Jaroszevska

1. $L^{p,\Phi}$ spaces and their application to elliptic partial differential operators 43 (1983) 151-157

P. D. Johnson Jr.

1. (and R. N. Mohapatra) The maximal normal subspace of the inverse image of a normal space of sequences by a non-negative matrix transformation 45 (1985) 105-120

H. Jondro

1. Les inégalités du type de Grunsky pour fonctions de la classe $\mathcal{H}$ 45 (1985) 43-53
2. Fonctions algébriques de Grunsky-Shah 45 (1985) 245-252

J. Kaczmarczyk

1. The difference method for non-linear elliptic differential equations with mixed derivatives 42 (1983) 125–138

J. Kalina

1. A variational characterization of condenser capacities in C^n within a class of plurisubharmonic functions 41 (1983) 167–173
2. Biholomorphic invariance of capacity and the capacity of an annulus 41 (1983) 175–183
3. (and B. Gaveau, J. Ławrynowicz, L. Wojtczak) The global Yang–Mills equations depending on an arbitrary metric 46 (1985) 105–114

A. Kamiński

1. (and P. N. Rathie, L. S. Sheng) Functional equations related to non-additive information measures 44 (1984) 285–296

Z. Kamont

1. (and J. Turo) A boundary value problem for quasilinear hyperbolic systems with a retarded argument 47 (1987) 347–360
2. (and K. Prządka) Difference methods for non-linear partial differential equations of the first order 48 (1988) 227–246

Pl. Kannappan

1. On a generalization of the sum form functional equation. VI 48 (1988) 153–165

A. G. Kartsatos

1. (and V. C. Dannon) The controllability of a quasilinear functional differential system 47 (1987) 371–380

Nguyen Van Khue

1. On the extension of holomorphic functions on a locally convex space 43 (1983) 267–282
2. On the extension of holomorphic maps on locally convex spaces with values in Fréchet spaces 44 (1984) 163–175
3. Riemann domains over Stein spaces 45 (1985) 11–21
4. Lifting uniformly continuous maps with values in nuclear Fréchet spaces 50 (1990) 291–297

M. Kisielewicz

1. Generalized functional-differential equations of neutral type 42 (1983) 139–148
2. Existence, uniqueness and continuous dependence of solutions of differential equations in Banach space 50 (1989) 117–128

J. Klaczak

1. Stability of a transport equation 49 (1988) 69–80

W. Kleiner

1. (and W. Mlak, A. Pliś) Jacek Szarski – 6.II.1921–21.II.1980 42 (1983) 1–3
2. Franciszek Leja 46 (1985) 1–11

J. Kloch

1. (and W. Hejmo) On the perturbations in a time-optimal closed-loop system 50 (1989) 37–52

R. A. Knight

1. Structure of certain closed flows 41 (1983) 247-254
2. Central motions 44 (1984) 197-200

S. Kołodziej

1. The logarithmic capacity in C^n 48 (1988) 253-267
2. Capacities associated to the Siciak extremal function 49 (1988) 279-290

Y. Komatu

1. On the range of analytic functions related to Carathéodory class 46 (1985) 141-145

V. Komkov

1. (and T. G. McLaughlin) Local analysis of non-standard C^∞ functions of pre-distributional type 44 (1984) 15-38

M. Kosiek

1. Representation generated by a finite number of Hilbert space operators 44 (1984) 309-315

W. Kosmala

1. (and W. C. Bauldry) On positive solutions of equations with two middle terms 50 (1990) 241-250

Z. Kowalski

1. Difference inequalities and error estimates for the Runge-Kutta method 42 (1983) 149-158

I. Kra

1. On algebraic curves (of low genus) defined by Kleinian groups 46 (1985) 147-156

P. H. Krief

1. Sur les formes différentielles fermées à coefficients différentiables mais non continûment différentiables 44 (1984) 201-207

J. G. Krzyż

1. Generalized Fredholm eigenvalues of a Jordan curve 46 (1985) 157-163

J. Kubarski

1. Complete differentials of higher order in linear fields modules 44 (1984) 129-153

I. Kubiacyk

1. Structure of the sets of weak solutions of an ordinary differential equation in Banach space 44 (1984) 67-72

L. P. Kučko

1. Linear functional equations with variable coefficients 49 (1988) 53-68

R. Kühnau

1. Zur Methode der Randintegration bei quasikonformen Abbildungen II 43 (1983) 105-110
2. Zur quasikonformen Spanne 46 (1985) 165-170

Kuo-Liang Chiou

1. On the asymptotic behavior of perturbed linear systems 41 (1983) 237–246

M. Kwapisz

1. (and Z. Jackiewicz) Convergence of multistep methods for Volterra integro-differential equations 43 (1983) 121–139

V. Lakshmikantham

1. (and S. Leela) On the method of upper and lower solutions in abstract cones 42 (1983) 159–164

A. Lasota

1. (and T. Dłotko) On the Tjon–Wu representation of the Boltzmann equation 42 (1983) 73–82

A. K. Layek

1. Intersection of essential cluster sets 41 (1983) 49–55
 2. Directional qualitative cluster sets 48 (1988) 167–173

J. W. Lee

1. (and D. O'Regan) Topological transversality. Applications to initial-value problems 48 (1988) 247–252

S. Leela

1. (and V. Lakshmikantham) On the method of upper and lower solutions in abstract cones 42 (1983) 159–164

J. Leiterer

1. An implicit function theorem in Banach spaces 46 (1985) 171–175

Le Tien Tam

1. Characterizations of H_{x_1} -sufficiency of jets 47 (1986) 17–24

Z. Lewandowski

1. Some remarks on univalence criteria for functions meromorphic in the exterior of the unit disc 46 (1985) 177–181

J. Ławrynowicz

1. (and B. Gaveau, J. Kalina, L. Wojtczak) The global Yang–Mills equations depending on an arbitrary metric 46 (1985) 105–114

K. Łoskot

1. (and A. L. Dawidowicz) Existence and uniqueness of solution of some integro-differential equation 47 (1986) 79–87

R. Majchrzak

1. On a weak coregular division of a differential space 43 (1983) 237–252

M. Malec

1. Schéma explicite des différences finies pour un système d'équations non

- linéaires du type parabolique avec des conditions aux limites non linéaires 41 (1983) 185-192
2. Inégalités différentielles fonctionnelles du type elliptique 42 (1983) 165-171
- A. Mamourian**
1. On a mixed boundary values problem for Lavrent'ev type equations 45 (1985) 149-156
- R. Manjini**
1. (and K. S. Padmanabhan) Differential subordination and meromorphic functions 49 (1988) 21-30
- H. Marcinkowska**
1. On internal approximations of parabolic problems 42 (1983) 173-180
- M. Marini**
1. (and M. Cecchi, P. L. Zezza) Boundary value problems on $[a, b]$ and singular perturbations 44 (1984) 73-80
- J. Marion**
1. G -Distributions et G -intégrales multiplicatives sur une variété 43 (1983) 79-92
- J. Matkowski**
1. On a characterization of L^p -norm 50 (1989) 137-144
- H. Matuszczyk**
1. On the tangent bundle and cotangent bundle of a differential space 43 (1983) 317-321
2. On foliations of differential spaces 48 (1988) 269-273
- Nguyen Van Mau (Нгуен Ван Май)**
1. О разрешимости в замкнутой форме сингулярных интегральных уравнений 45 (1985) 193-202
- R. Mazur**
1. On the coefficients of some classes of starlike functions 41 (1983) 43-48
- T. G. McLaughlin**
1. (and V. Komkov) Local analysis of non-standard C^∞ functions of pre-distributional type 44 (1984) 15-38
- A. Meimaridou**
1. On the tangency of multifunctions 45 (1985) 143-148
- K. Menke**
1. Tsuji points and conformal mapping 46 (1985) 183-187
- Z. Mikolajska**
1. Une remarque sur les inégalités différentielles 42 (1983) 181-185

2. Remarque sur une propriété asymptotique des solutions d'une équation différentielle à paramètre retardé 43 (1983) 261–265
 3. Sur l'existence d'une solution périodique d'une équation différentielle à paramètre retardé et à petit paramètre 44 (1984) 1–13

1. On some properties of LB -splines 46 (1985) 379-388

S. Yamamuro

1. A remark on regularly separated closed sets 42 (1983) 403-408

S. Yamashita

1. Hardy norm, Bergman norm, and univalence 43 (1983) 23-33

Cheh-Chih Yeh

1. (and Haruo Murakami, Shin-ichi Nakagiri) Asymptotic behavior of solutions of non-linear differential equations with deviating arguments via non-standard analysis 41 (1983) 203-208

D. Yost

1. L_1 contains every two-dimensional normed space 49 (1988) 17-19

He Yuzan

1. A class of special Hardy-Orlicz spaces and the space of $BMOA$ functions 48 (1988) 217-226

A. Zajtz

1. Geometric objects with finitely determined germs 49 (1988) 157-168
2. On the order of natural differential operators and liftings 49 (1988) 169-178

J. Zderkiewicz

1. (et Z. Bogucki) Sur la courbure des lignes de niveau dans la classe S_{ak}^c des fonctions convexes d'ordre α et k -symétriques 41 (1983) 37-42
2. (et Z. Bogucki) Remarques sur un problème de M. Biernacki relatif aux fonctions subordonnées dans le cas des majorantes convexes 45 (1985) 157-159

A. Zeriahi

1. Ensembles pluripolaires exceptionnels pour la croissance partielle des fonctions holomorphes 50 (1989) 81-91

P. L. Zezza

1. (and M. Cecchi, M. Marini) Boundary value problems on $[a, b]$ and singular perturbations 44 (1984) 73-80

B. Ziemian

1. (and Z. Szmydt) Fundamental solution for operators preserving
a quadratic form 42 (1983) 369–386
2. Distributions invariant under compact Lie groups 43 (1983) 175–183
3. (and Z. Szmydt) An invariance method for constructing fundamental
solutions for $P(\square_{mn})$ 46 (1985) 333–360

W. Żelazko

1. A non- m -convex algebra on which operate all entire functions 46 (1985) 389–394
