PROCEEDINGS
OF THE TENTH CONFERENCE
ON ANALYTIC FUNCTIONS

SZCZYRK, APRIL 22–27, 1990

WARSZAWA 1991

Les ANNALES POLONICI MATHEMATICI constituent une continuation des
ANNALES DE LA SOCIÉTÉ POLONAISE DE MATHÉMATIQUE (vol. I-XXV)
fondées en 1921 par Stanisław Zaremba.

Les ANNALES POLONICI MATHEMATICI publient, en langues des congrès internationaux, des travaux consacrés à *l'Analyse Mathématique* et à *la Géometrie*. Chaque volume paraît en 3 fascicules.

Les manuscrits dactylographiés, précédé d'un résumé ne surpassant pas 200 mots, sont à expédier, en deux exemplaires, à l'adresse: Rédaction des

ANNALES POLONICI MATHEMATICI
Św. Tomasza 30, 31-027 Kraków, Pologne

Toute la correspondance concernant les abonnements, l'échange et l'achat des fascicules antérieurs est à expédier à l'adresse:

FOREWORD

The Tenth Conference on Analytic Functions was held in Szczyrk from April 22 to April 27, 1990.

Organizing Committee: C. Andreian Cazacu (Bucharest), Z. Charzyński (Łódź), P. Dolbeault (Paris), F. W. Gehring (Ann Arbor), A. A. Gonchar (Moscow), L. Iliev (Sofia), Z. J. Jakubowski (Łódź), M. Jarnicki (Kraków; Vice-Chairman), C. O. Kiselman (Uppsala), J. Krzyż (Lublin), O. Lehto (Helsinki), J. Leiterer (Berlin), P. Lelong (Paris), J. Lawrynowicz (Łódź), S. Łojasiewicz (Kraków), P. Pflug (Vechta), W. Pleśniak (Kraków), K. Rusek (Kraków; Secretary), J. Siciak (Kraków; Chairman), W. Tutschke (Halle), V. S. Vladimirow (Moscow), T. Winiarski (Kraków).

The main topics were: geometric function theory of one complex variable, quasiconformal mappings, complex analysis in several variables and potential theory in \mathbb{C}^n .

140 mathematicians from 20 countries participated in the Conference. They delivered 28 one-hour lectures and 87 short communications.

The organizer of the Conference was the Institute of Mathematics of the Jagiellonian University.

The Conference was sponsored by the Institute of Mathematics of the Polish Academy of Sciences as well as by the Universities of Łódź and Lublin and by the Technical University of Rzeszów.

The Organizing Committee expresses its gratitude to all these institutions and to all people who helped the organizers in their efforts.

*

The Proceedings consist of the list of participants, the list of all lectures and communications and of 36 papers submitted to this volume. Most of the papers contain original results announced during the Conference; only a few of them are of survey character.

Kamil Rusek

Secretary

CONTENTS

List of participants	iv–v
Program:	
I. Lectures (45 min.)	vi
II. Communications (20 min.)	vii–ix
Papers submitted to the Proceedings:	
C. Andreian Cazacu, On the disc theorem	1–10
A. Boivin and R. Dwilewicz, Holomorphic approximation of CR functions on tubular submanifolds of \mathbb{C}^2	11–18
R. Brummelhuis and J. Wiegerinck, Representing measures for the disc algebra and for the ball algebra	19–35
P. Caraman, New cases of equality between p -module and p -capacity	37–56
S. Cynk and P. Tworzewski, Diagonal series of rational functions	57–63
S. Dimiev, Holomorphic non-holonomic differential systems on complex manifolds	65–73
G. Dimkov, On products of starlike functions. I	75–79
G. Dimkov, J. Stankiewicz and Z. Stankiewicz, On a class of starlike functions defined in a halfplane	81–86
M. M. Djrbashian and A. H. Karapetyan, Integral representations for some weighted classes of functions holomorphic in matrix domains	87–94
L. M. Drużkowski, A geometric approach to the Jacobian Conjecture in \mathbb{C}^2	95–101
M. Frontczak and A. Miodek, Weil's formulae and multiplicity	103–108
J. Fuka and Z. J. Jakubowski, On certain subclasses of bounded univalent functions	109–115
A. Z. Grinshpan, Univalent functions with logarithmic restrictions	117–138
C. D. Hill and S. R. Simanca, The super complex Frobenius theorem	139–155
W. Hyb, On the spectral properties of translation operators in one-dimensional tubes	157–161
A. Janik, On approximation of analytic functions and generalized orders	163–167
M. Jarnicki and P. Pflug, Invariant pseudodistances and pseudometrics —completeness and product property	169–189
M. Jędrzejowski, The homogeneous transfinite diameter of a compact subset of \mathbb{C}^N	191–205
S. Kołodziej, Jung's type theorem for polynomial transformations of \mathbb{C}^2	207–212
T. Krasiński, On branches at infinity of a pencil of polynomials in two complex variables	213–220
A. Krok and T. Mazur, The kaehlerian structures and reproducing kernels ..	221–224

W. Królikowski, Anisotropic complex structure on the pseudo-Euclidean Hurwitz pairs	225–240
K. Kurdyka, A counterexample to subanalyticity of an arc-analytic function	241–243
J. Lawrynowicz, K. Kędzia and O. Suzuki, Supercomplex structures, surface soliton equations, and quasiconformal mappings	245–268
J. M. Myszewski, On roots of the automorphism group of a circular domain in \mathbb{C}^n	269–276
D. Partyka, A distortion theorem for quasiconformal automorphisms of the unit disk	277–281
M. Passare, A new division formula for complete intersections	283–286
Z. Pasternak-Winiarski, On the dependence of the Bergman function on deformations of the Hartogs domain	287–300
K. Spallek, Continuous transformation groups on spaces	301–320
S. Spodzieja, Some criteria for the injectivity of holomorphic mappings	321–323
H. M. Srivastava, Applications of certain linear operators in the theory of analytic functions	325–330
A. Strzeboński, The growth of regular functions on algebraic sets	331–341
T. Szemberg, Automorphisms of Riemann surfaces with two fixed points	343–347
K. Tochowicz, The classes of univalent functions connected with homographies	349–355
A. Wrzesień, On some majorization of derivatives in the class $S^*(\gamma)$	357–359
J. Zająć, Distortion function and quasisymmetric mappings	361–369

PROGRAM

I. LECTURES (45 min.)

1. R. Achilles, Excess intersections in complex analytic geometry.
2. L. I. Aĭzenberg, On holomorphic continuation from a part of the boundary.
3. J. Bingener, Infinite-dimensional superanalysis.
4. P. Caraman, New cases of equality between p -module and p -capacity in \mathbb{R}^n .
5. E. M. Chirka, CR-foliations.
6. G. Dloussky, On filling holes in dimension two.
7. P. Dolbeault, On CR-analytic chains with given boundaries.
8. P. Duren, Univalent functions with range of prescribed capacity.
9. Z. J. Jakubowski, Extremal problems in some classes of analytic functions.
10. B. Kaup, Hyperbolic \mathbb{C}^* -actions on affine algebraic surfaces.
11. J. Korevaar, Fields of electrons on the sphere and quadrature problems.
12. J. Krzyż, Generalized Neumann–Poincaré operator and chord-arc curves.
13. J. Lawrynowicz (with K. Kędzia and O. Suzuki), Supercomplex structures, surface soliton equations, and quasiconformal mappings.
14. M. Morimoto, Analytic functionals on the complex light cone and their Fourier–Borel transformations.
15. I. M. Milin, Leningrad school of geometric theory of functions of one complex variable.
16. P. Pflug (with M. Jarnicki), Properties of invariant distances—a survey.
17. A. Płoski, On the irreducibility of polynomials in several variables.
18. L. I. Ronkin, Jenssen’s theorems for holomorphic almost-periodic functions in several variables.
19. S. Ruscheweyh, Multipliers for convex harmonic mappings.
20. A. G. Sergeev, On pseudoconvexity of matrix domains.
21. K. Spallek, Transformation groups on spaces.
22. J. Stankiewicz (with Z. Stankiewicz), On classes of functions regular in a half-plane.
23. P. M. Tamrazov, Removable singularities of plurisubharmonic functions in topological vector spaces.
24. A. K. Tsikh, The method of principal residue in Leray’s theory.
25. W. Tutschke, The role of analyticity for solving Cauchy–Kovalevskaya problems.
26. T. Winiarski, Global and local criteria for algebraicity.
27. A. P. Yuzhakov, Calculation of the full sum of local residua with respect to a polynomial mapping.
28. M. G. Zaïdenberg, Ramanujan surfaces and exotic algebraic structures on \mathbb{C}^n .

II. COMMUNICATIONS (20 min.)

1. C. Andreian Cazacu, On the disc theorem.
2. —, Some generalizations of the Zorich Theorem by M. Cristea.
3. M. Baran, Bernstein type theorems for compact sets in \mathbb{C}^n .
4. A. Boivin, Holomorphic approximation in the complex plane—generalization of the Vitushkin Theorem.
5. P. Bonneau, On $\bar{\partial}$ -equations on weakly pseudoconvex domains.
6. J. S. R. Chisholm, Clifford–Padé approximation.
7. J. Chmielowski, Quelques remarques sur les ensembles déterminants.
8. S. Cynk, Diagonal series of rational functions.
9. J. Czyż, Summation formula for the coefficients in the Hausdorff series.
10. S. Dimiev, Local non-holonomic complex analytic geometry.
11. G. Dimkov, On products of starlike functions.
12. M. Downarowicz, On exceptional cones for partial type.
13. J. Dronka, On the location of critical points of a polynomial.
14. L. Drużkowski, The Jacobian Conjecture—a few steps towards solution.
15. M. Frontczak, A new simple proof of the Weil Integral Formula.
16. J. Fuka (with Z. Jakubowski), On a class of univalent functions.
17. G. Gentili, Regular quaternionic maps and $\bar{\partial}$ -type operators.
18. B. Gilligan, Complex analysis on homogeneous manifolds.
19. A. Z. Grinshpan, Univalent functions with logarithmic restrictions.
20. C. D. Hill, Counterexamples to the Newlander–Nirenberg Theorem up to the boundary and positive results for complex supermanifolds.
21. V. Z. Hristov, Remarks on Carathéodory and Kobayashi distances.
22. S. M. Ivashkovich, Rational curves, shells and extension of holomorphic maps.
23. P. Jakóbczak, Division by a holomorphic matrix in strictly pseudoconvex domains.
24. A. Janik, On approximation of analytic functions and generalized orders.
25. Z. Jelonek, Sets determining polynomial automorphisms of \mathbb{C}^n .
26. M. Jędrzejowski, The homogeneous transfinite diameter for compact subsets of \mathbb{C}^n .
27. L. Kaczmarek, Bounds of univalent functions in terms of iterated extrema.
28. V. S. Kiryakova, Generalized fractional differintegrals and their use in univalent function theory.
29. S. Koshi, Extremal problems in H^1 -space.
30. R. Kovacheva, Regions of uniform convergence of rational Chebyshev approximants with an unbounded number of poles.
31. I. F. Krasichkov-Ternovskii, General description of closed ideals and submodules of the analytic functions of one variable.
32. T. Krasiński, Bifurcation points of polynomials and the Jacobian Conjecture in \mathbb{C}^2 .
33. —, Properness and the Jacobian Conjecture in \mathbb{C}^2 .
34. N. G. Kruzhilin, On hulls of two-dimensional spheres in \mathbb{C}^2 .
35. K. Kurdyka, A counterexample to subanalyticity of an arc-analytic function.
36. M. Kwieciński, Polynomial mappings and Gröbner bases—a criterion for isomorphism of varieties.
37. E. Ligocka, A characterization of ellipsoids and balls in \mathbb{C}^n .
38. V. Ya. Lin, On the Liouville property connected with amenable group actions.
39. —, On superposition problem for algebraic functions of several complex variables.

40. J. Lawrynowicz (with J. Rembieliński), On Fueter-like equations for J^3 -triples and regularity.
41. J. Macura, On the second variation for univalent meromorphic functions.
42. T. Maszczyk, Noncommutative analyticity and instantons.
43. T. Mazur, On complex manifolds of Bergman type.
44. J. McNeal, Necessary conditions for Hölder estimates on solutions to $\bar{\partial}$ -equations.
45. N. Mihalache, Special neighbourhoods of analytic sets in Stein spaces.
46. A. Miodek (with J. Chądzyński and T. Krasinski), On radical complete intersections.
47. J. Myszewski, On the structure of the Lie algebra of the automorphism group of a circular domain in \mathbb{C}^n .
48. R. Naecki, One-sided quasidiscs.
49. V. V. Napalkov, Some problems on convolution equations.
50. D. Partyka, A distortion theorem for quasiconformal automorphisms of the unit disk.
51. E. Pascu, On superanalytic algebras.
52. M. Passare, Polynomial interpolation and complex convexity.
53. Z. Pasternak-Winiarski, On dependence of the Bergman function on deformation of the Hartogs domain.
54. K. Peters, C^k -estimates for the $\bar{\partial}$ -equation of non-transversal intersections of strictly pseudoconvex domains.
55. K. Pethe, On a functional defined in the class of p -valued functions.
56. A. Pierzchalski, Quasiconformal deformations of manifolds with boundary.
57. V. Pokhilevich, On subclasses of regular univalent functions with a fixed coefficient.
58. E. Ramirez de Arellano (with W. Królikowski), An integral representation for Fueter-Hurwitz regular functions.
59. P. Rusev, Müntz type theorems for systems of degenerate hypergeometric functions.
60. G. Schmalz, Identification of pseudoconvex domains by the Bergman operator.
61. J. Siciak (with Nguyen Thanh Van), Doubly orthogonal systems of holomorphic functions and extremal plurisubharmonic functions.
62. R. Sitarski, On some L -analytic maps of two variables.
63. K. Skalska, On typically-real functions meromorphic in the unit disc.
64. P. Skibiński, Description of the set of critical points of a polynomial mapping in two variables.
65. M. Skwarczyński, Bergman function, alternating projections, L^2 -angles.
66. A. Sowa, Schwarz's derivative in high dimensions.
67. S. Spodzieja, A criterion of injectivity of holomorphic mappings.
68. H. M. Srivastava, Applications of certain linear operators in the theory of analytic functions.
69. J. Stankiewicz (with Z. Jakubowski), On classes of functions with non-classical normalization.
70. V. V. Starkov, Linear-invariant families with Stieltjes representation involving complex measures.
71. A. Strzeboński, Growth of regular functions on algebraic sets.
72. W. Szapiel (with W. Hengartner), On univalent functions omitting a given value.
73. T. Szemberg, Automorphisms of Riemann surfaces with two fixed points.
74. K. Tochowicz, The classes of univalent functions connected with homographies.
75. P. Tworzewski, Improper isolated intersections in complex analytic geometry.
76. V. Vijiitu, A remark on Runge domains.

77. J. Waniurski, The Bloch constant for the Möbius transforms of convex mappings.
78. E. Wegert, On interpolation and approximation with families of holomorphic functions.
79. J. Wiegerinck, Representing measures for the disc algebra and for the ball algebra.
80. K. Włodarczyk, Angular derivative for holomorphic maps in complex Banach spaces.
81. P. Wojtaszczyk, Bases in the disc algebra.
82. A. Wójcik, Some remarks on Bernstein's Theorems.
83. A. Wrzesień, On some majorization of derivatives in the class $S^*(\gamma)$.
84. Xing Yang, A generalization of the Müntz–Szasz Theorem.
85. M. G. Zaïdenberg, Normal mappings and growth estimates of Schottky–Landau type.
86. J. Zająć, Distortion function and quasisymmetric mappings.
87. K. Zyskowska, On an estimate of some functional in the class of odd bounded univalent functions.
