

## Acknowledgment of priority

by

A. MOUHIB (Taza)

It has recently come to my attention that the result of Proposition 3.3 of my paper “Infinite Hilbert 2-class field tower of quadratic number fields”, *Acta Arith.* 145 (2010), 267–272, is a consequence of Satz 1 of B. Schmithals’s paper “Konstruktion imaginärquadratischer Körper mit unendlichem Klassenkörperturm”, *Arch. Math. (Basel)* 34 (1980), 307–312.

I apologize for any embarrassment this may cause.
