

PREFACE

Most of the papers in this volume have been presented at the International Conference on Game Theory and Mathematical Economics, in Memory of Jerzy Łoś, held at the International Stefan Banach Center in Warsaw, September 6–10, 2004.

Professor Jerzy Łoś is known as distinguished logician and algebraist; he also devoted the last decades of his scientific activity to game theory and mathematical economics. The conference, organized by his former students and collaborators, was attended by many of those who knew him and admired for various reasons.

The Editorial Board of this volume owes much to many people, in particular to the referees of the submitted papers. Our special thanks go to Jan Werner from the University of Minnesota for substantial help in editorial work.
