

## CONTENTS

List of participants . . . . .	v–vi
List of lectures . . . . .	vii
<b>I. Józef Siciak—a teacher, scientist and colleague</b>	
K. CIESIELSKI, Professor Józef Siciak—a scholar and educator . . . . .	1–15
The toast proposed by Andrzej Pelczar . . . . .	17–18
The toast proposed by Christer O. Kiselman . . . . .	19–20
<b>II. Survey articles</b>	
P. PFLUG, Extension of separately holomorphic functions—a survey 1899–2001 . . . . .	21–36
W. PLEŚNIAK, Siciak’s extremal function in complex and real analysis . . . . .	37–46
<b>III. Other papers</b>	
L. AIZENBERG, E. LIFLYAND and A. VIDRAS, Multidimensional analogue of the van der Corput–Visser inequality and its application to the estimation of the Bohr radius . . . . .	47–54
T. BLOOM, N. LEVENBERG and S. MA’U, Robin functions and extremal functions . . . . .	55–84
J. BOCHNAK and W. KUCHARZ, Approximation of holomorphic maps by algebraic morphisms . . . . .	85–92
M. CARLEHED et J. WIEGERINCK, Le cône des fonctions plurisousharmoniques négatives et une conjecture de Coman . . . . .	93–108
E. M. CHIRKA, A generalization of Radó’s theorem . . . . .	109–112
E. M. CHIRKA, On the removal of subharmonic singularities of plurisubharmonic functions . . . . .	113–116
S. CYNK, Cyclic coverings of Fano threefolds . . . . .	117–124
A. EDIGARIAN, A note on Rosay’s paper . . . . .	125–132
M. L. FANG and L. ZALCMAN, Normal families and shared values of meromorphic functions . . . . .	133–141
M. JARNICKI and P. PFLUG, An extension theorem for separately holomorphic functions with analytic singularities . . . . .	143–161
R. JURASIŃSKA and J. STANKIEWICZ, Coefficients in some classes defined by subordination to multivalent majorants . . . . .	163–170
M. KLIMEK, On perturbations of pluriregular sets generated by sequences of polynomial maps . . . . .	171–184
S. KOŁODZIEJ, A regularity theorem for the complex Monge–Ampère equation in $\mathbb{C}P^n$ . . . . .	185–192

---

On pages 257–274, you will find the index of volumes 71–80 of *Annales Polonici Mathematici*.

T. KRASIŃSKI and K. J. NOWAK, Intersection of analytic curves . . . . .	193–202
NGUYEN THANH VAN, Analytic continuation for some classes of separately analytic functions of real variables . . . . .	203–209
R. PIERZCHAŁA, On roots of polynomials with power series coefficients . . . .	211–217
T. SOBIESZEK, On the Hartogs extension theorem . . . . .	219–222
W. SYZDEK, Nagata submaximal curves on $\mathbb{P}^1 \times \mathbb{P}^1$ . . . . .	223–230
T. WINIARSKA and T. WINIARSKI, Regularity of domains of parameterized families of closed linear operators . . . . .	231–241
V. ZAHARIUTA, On approximation by special analytic polyhedral pairs . . . .	243–256
