

The above poster of the conference, designed by Emilia Bojańczyk, involves the motif of “Borsuk’s Double Tornado” as depicted in *Topol. Methods Nonlinear Anal.* 1 (1993), p. 174. It was first described in K. Borsuk’s paper in *Fund. Math.* 24 (1935), pp. 51–58, to yield an acyclic continuum lacking the fixed point property.
