

This special volume of “Fundamenta Mathematicae” contains a collection of selected papers submitted on the occasion of the Third International Conference “Knots in Poland”. Like with earlier special volumes related to the Second of these Conferences, held in 2003, we hope that publishing these papers in Fundamenta will stimulate new ideas and lead to further research.

The Conference was held at the Stefan Banach International Mathematical Center in Warsaw (July 19–25, 2010) and Będlewo (July 25 – August 4, 2010) and was supported by the Center, by Warsaw University, and by National Science Foundation (USA). Other papers presented at the Conference will be published in two volumes of Banach Center Publications. For further information on the conference see <http://www.mimuw.edu.pl/~traczyk/knotpol2010/> and <http://atlas-conferences.com/cgi-bin/abstract/cbam-01>.

We would like to thank the contributors to this volume and all the participants for helping to make the conference a success.
