Corrigendum to the paper "On the greatest common divisor of two univariate polynomials, II"

(Acta Arith. 98 (2001), 95–106)

by

A. Schinzel (Warszawa)

On page 102, line -6 the following corrections are necessary:

1) for (n, m) read $(n - m)$,
2) for $F = u^d F_0\big(\frac{x}{u}\big)$ read $F = u^{d(n,m)/l} F_0\big(\frac{x}{u^{(n,m)/l}}\big)$.

The second correction pointed out by G. Turnwald is also necessary in reference [3], page 49, line 5 and in Publ. Math. Debrecen 56 (2000), p. 576, line -9, where $d = 1$.

On page 106, line 18 for x^6 read x^9.
