

## Sommaire des tomes XXI-XXX

	Tome	Pages
<b>Ангосик, П.</b>		
1. Об изоморфизме некоторых колец операторов . . . . .	25	227-230
2. Порядок относительно меры и его применение к исследованию произведения обобщенных функций . . . . .	26	239-254
<b>Aronszajn, N.</b>		
1. (and U. Fixman) Algebraic spectral problems . . . . .	30	273-338
<b>Balcerzyk, S.</b>		
1. Power series as orthogonal expansions . . . . .	23	31-39
<b>Baric, L. W.</b>		
1. (and W. Ruckle) Matrix transformations of Schauder bases . . . . .	28	275-278
<b>Berg, L.</b>		
1. Asymptotische Auffassung der Operatorenrechnung . . . . .	21	215-229
<b>Berenstein, C. A.</b>		
1. (and M. Cotlar, N. Kerzman and P. Krée) Some remarks on the Marcinkiewicz convexity theorem in the upper triangle . . . . .	29	79-95
<b>Billard, P.</b>		
1. Séries de Fourier aléatoirement bornées, continues, uniformément convergentes . . . . .	22	309-329
2. Sur la convergence presque partout des séries de Fourier-Walsh des fonctions de l'espace $L^2(0, 1)$ . . . . .	28	363-388
<b>Birkholc, A.</b>		
1. On generalized power methods of limitation . . . . .	27	213-245
<b>Birtel, F. T.</b>		
1. (and J. A. Lindberg) A Liouville algebra of non-entire functions . . . . .	25	27-31

- Boehme, T. K.**
1. On sequences of continuous functions and convolution 25 333-335
- Bourne, S.**
1. On normed semialgebras . . . . . 21 45-54
  2. On positive Banach halfalgebras without identity . . . 22 247-249
  3. On positive Banach \*-semialgebras . . . . . 21 207-214
- Brooks, R. M.**
1. A ring of analytic functions . . . . . 24 191-210
  2. On the spectrum of finitely-generated locally  $m$ -convex algebras . . . . . 29 143-150
- Bùi-Trong-Liêú**
1. (et D. A. Carton) Sur la loi du  $\chi^2$  dans certains processus de Markov . . . . . 24 25-35
  2. (et M. Dorel) Sur le comportement asymptotique de processus de Markov non homogènes . . . . . 28 253-274
- Buraczewski, A.**
1. The determinant theory of generalized Fredholm operators . . . . . 22 265-307
- Burnat, M.**
1. Die Spektraldarstellung einiger Differentialoperatoren mit periodischen Koeffizienten im Raume der fastperiodischen Funktionen . . . . . 25 33-64
  2. Об исследовании собственных функций непрерывного спектра оператора  $-\Delta u + q(x_1, x_2, x_3)u$  в случае наличия особенности у  $q(x_1, x_2, x_3)$  . . . . . 22 181-195
- Calderón, A. P.**
1. Intermediate spaces and interpolation, the complex method . . . . . 24 113-190
  2. (and A. Zygmund) On higher gradients of harmonic functions . . . . . 24 211-226
  3. Spaces between  $L^1$  and  $L^\infty$  and the theorem of Marcinkiewicz . . . . . 26 273-299
- Cambern, M.**
1. Isometries of certain Banach algebras . . . . . 25 217-225
  2. On mappings of sequence spaces . . . . . 30 73-77
- Carton, D. A.**
1. (et Bùi-Trong-Liêú) Sur la loi du  $\chi^2$  dans certains processus de Markov . . . . . 24 25-35
- Церетели, О. Д.**
1. О неопределённом  $A$ -интеграле и рядах фурье ( $A$ ) 22 59-83
- Ciesielski, Z.**
1. Properties of the orthonormal Franklin system . . . . . 23 141-157
  2. Properties of the orthonormal Franklin system, II . . . . . 27 289-323
- Chao-Ping Chang**
1. On a condition for almost everywhere Bochner-Riesz summability of multiple Fourier series . . . . . 28 145-154
  2. On Bochner-Riesz summability almost everywhere of multiple Fourier series . . . . . 26 25-66
- Харазов, Д. Ф.**
1. Симметризуемые операторы в банаховых пространствах и их приложения . . . . . 27 169-188
- Coifman, R.**
1. (and G. Weiss) A kernel associated with certain multiply connected domains and its applications to factorization theorems . . . . . 28 31-68
- Constantinesco, F.**
1. Sur la valeur d'une distribution dans un point . . . . . 24 7-12
- Copping, J.**
1. Mercerian theorems and inverse transformations . . . . . 21 177-194
- Cotlar, M.**
1. (and C. A. Berenstein, N. Kerzman and P. Krée) Some remarks on the Marcinkiewicz convexity theorem in the upper triangle . . . . . 29 79-95
- Crownover, R. M.**
1. Concerning function algebras . . . . . 25 353-365
- Davies, R. O.**
1. A norm satisfying the Bernstein condition . . . . . 29 219-220
- Davis, W. J.**
1. (and D. W. Dean) The direct sum of Banach spaces with respect to a basis . . . . . 28 209-219
- Dean, D. W.**
1. (and W. J. Davis) The direct sum of Banach spaces with respect to a basis . . . . . 28 209-219

**Deeds, J. B.**

1. The Stone-Čech operator and its associated functionals . . . . . 29 5-17
2. Summability of vector sequences . . . . . 30 361-372

**Detraz, J.**

1. Sous-algèbres de codimension 1 et dérivations dans les algèbres de Banach commutatives . . . . . 30 79-82

**Dinculeanu, N.**

1. Integral representation of vector measures and linear operations . . . . . 25 181-205

**Donoghue, W. F.**

1. On a theorem of K. Maurin . . . . . 24 1-5

**Dorel, M.**

1. (et Bùi-Trong-Lieu) Sur le comportement asymptotique de processus de Markov non homogènes . . . . . 28 253-274

**Dubinsky, E.**

1. (and J. R. Retherford) Schauder bases in compatible topologies . . . . . 28 221-226

**Dudley, R. M.**

1. Convergence of Baire measures . . . . . 27 251-268

**Fabes, E. B.**

1. (and N. M. Rivière) Commutators of singular integrals . . . . . 27 9-17
2. (and C. Sadosky) Pointwise convergence for parabolic singular integrals . . . . . 26 225-232
3. Singular integrals and partial differential equations of parabolic type . . . . . 28 81-131
4. Singular integrals with mixed homogeneity . . . . . 27 19-38

**Fixman, U.**

1. (and N. Aronszajn) Algebraic spectral problems . . . . . 30 273-338

**Fleming, R. J.**

1. (and R. D. McWilliams and J. R. Retherford) On  $w^*$ -sequential convergence, type  $P^*$  bases, and reflexivity . . . . . 25 325-332
2. Weak\*-sequential closure and the characteristic of subspaces of conjugate Banach spaces . . . . . 26 271-277

**Foiaş, C.**

1. Approximation des opérateurs de J. Mikusiński par des fonctions continues . . . . . 21 73-74
2. (and W. Mlak) The extended spectrum of completely non-unitary contractions and the spectral mapping theorem. . . . . 26 231-237

**Freud, G.**

1. (and S. Knapowski) On linear processes of approximation (I). . . . . 23 105-112
2. (and S. Knapowski) On linear processes of approximation (II) . . . . . 25 251-263
3. (and S. Knapowski) On linear processes of approximation (III). . . . . 25 373-384

**Garling, D. J. H.**

1. Symmetric bases of locally convex spaces . . . . . 30 163-181

**Gani, J.**

1. A stochastic dam process with non-homogeneous Poisson inputs . . . . . 21 307-315
2. Corrigenda to my paper "A stochastic dam process with non-homogeneous Poisson inputs" . . . . . 22 3-71

**Gindler, H. A.**

1. (and A. E. Taylor) The minimum modulus of a linear operator and its use in spectral theory . . . . . 22 15-41

**Gordon, L.**

1. Perron's integral for derivatives in  $L'$  . . . . . 28 295-316

**Горст, Ю. Г.**

1. Некоторые слабые методы суммирования . . . . . 28 155-168

**Grove, L. C.**

1. A generalized group algebra for compact groups . . . . . 26 73-90

**Grünbaum, F.**

1. (and E. H. Zarantonello) Cross-continuity vs. continuity . . . . . 27 273-288

**Halperin, I.**

1. Extension of the rank function . . . . . 27 325-335
2. Intrinsic description of the Sz.-Nagy-Brehmer unitary dilation . . . . . 22 211-219

**Hartman, S.**

1. (und C. Rylli-Nardzewski) Anerkennung der Priorität . . . . . 21 375  
 2. Les intégrales de fonctions presque-périodique et les sections de séries de Fourier . . . . . 22 147-160

**Hattemer, J. R.**

1. Boundary behavior of temperatures I . . . . . 25 111-155

**Herman, R.**

1. (and R. Whitley) An example concerning reflexivity . . . . . 28 289-294  
 2. On the uniqueness of the ideals of compact and strictly singular operators . . . . . 29 161-165

**Holsztyński, W.**

1. Continuous mappings induced by isometries of spaces of continuous function . . . . . 26 133-136

**Honda, K.**

1. On normed lattices topologically isomorphic to some Orlicz space  $L_\phi^*$  . . . . . 29 203-218

**Herda, H.-H.**

1. Modular spaces of generalized variation . . . . . 30 21-42  
 2. Uniformly convex and reflexive modulated variation spaces . . . . . 30 373-381

**Hsu, L. C.**

1. Approximation of non-bounded continuous functions by certain sequences of linear positive operators or polynomials . . . . . 21 37-43

**Hulanicki, A.**

1. Groups whose regular representation weakly contains all unitary representations . . . . . 24 37-59  
 2. Means and Følner condition on locally compact groups . . . . . 27 87-104

**Ivković, Z.**

1. Sur une représentation de la prediction d'un processus stationnaire régulier . . . . . 26 137-142

**Jajte, R.**

1. On stable distributions in Hilbert space . . . . . 30 63-71  
 2. On the probability measures in Hilbert spaces . . . . . 29 221-241

**James, R. C.**

1. Characterizations of reflexivity . . . . . 23 205-216

**Jentsch, W.**

1. Charakterisierung der Quotienten in der zweidimensionalen diskreten Operatorenrechnung . . . . . 26 91-99

**Kadec, M. I.**

1. (and A. Pełczyński) Bases, lacunary sequences and complemented subspaces in the spaces  $L_p$  . . . . . 21 161-176  
 2. (и А. Пелчиньски) Базисные последовательности, биортогональные системы и нормирующие множества в пространствах Банаха и Фреше . . . . . 25 297-323

**Kahane, J.-P.**

1. (and W. Żelazko) A characterization of maximal ideals in commutative Banach algebras . . . . . 29 339-343  
 2. Sur les coefficients de Fourier-Bohr . . . . . 21 103-106  
 3. (et Y. Katznelson) Sur les ensembles de divergence des séries trigonométriques . . . . . 26 269-270  
 4. Sur les fonctions presque-périodiques généralisées dont le spectre est vide . . . . . 21 231-236

**Kassimatis, C.**

1. On generalized derivatives . . . . . 25 369-371

**Katznelson, Y.**

1. Sur les ensembles de divergence des séries trigonométriques . . . . . 26 265-268  
 2. (et J.-P. Kahane) Sur les ensembles de divergence des séries trigonométriques . . . . . 26 269-270  
 3. Une remarque concernant la formule de Poisson . . . . . 29 107-180

**Kaufman, R.**

1. Interpolation of additive functionals . . . . . 27 269-272  
 2. Measures in independent sets . . . . . 30 17-20  
 3. The spectrum of an infinite product measures . . . . . 29 59-62

**Kerzman, N.**

1. (and C. A. Berenstein, M. Cotlar and P. Krée) Some remarks on the Marcinkiewicz convexity theorem in the upper triangle . . . . . 29 79-95

**Kielbasiński, A.**

1. On the iterative procedures of best strategy for inverting a self-adjoint positive-definite bounded operator in Hilbert space . . . . . 24 13-23

**Kierat, W.**

1. On operational calculus of germs and the Laplace transform of germs . . . . . 28 139-143
2. Une remarque sur les logarithmes unilatéraux . . . . . 24 281-283
3. (et J. Mikusiński) Sur un théorème de calcul opérationnel d'intervalle fini . . . . . 25 93-96

**Kijowski, J.**

1. (and W. Szczyrba) On differentiability in an important class of locally convex spaces . . . . . 30 247-257

**Kisyński, J.**

1. On the generation of tight measures . . . . . 30 141-151
2. Sur les opérateurs de Green des problèmes de Cauchy abstraits . . . . . 23 285-328

**Kitchen, J. W.**

1. Concerning the convergence of iterates to fixed points . . . . . 27 247-249

**Klee, V.**

1. Summability in  $\ell(p_1, p_2, \dots)$  spaces . . . . . 25 277-280
2. Two examples in the theory of topological linear spaces . . . . . 25 385-390

**Knapowski, S.**

1. (and G. Freud) On linear processes of approximation (I) . . . . . 23 105-112
2. (and G. Freud) On linear processes of approximation (II) . . . . . 25 251-263
3. (and G. Freud) On linear processes of approximation (III) . . . . . 25 373-384

**Komorowski, J.**

1. A modern version of the E. Noethers theorems in the calculus of variations, I . . . . . 29 261-273

**Koshi, S.**

1. (and T. Shimogaki) On quasi-modular spaces . . . . . 21 15-35

**Krée, P.**

1. (and C. A. Berenstein, M. Cotlar and N. Kerzman) Some remarks on the Marcinkiewicz convexity theorem in the upper triangle . . . . . 29 79-95

**Kubik, L.**

1. A characterization of the class  $L$  of probability distributions . . . . . 21 245-252
2. On the class of infinitely divisible distributions and its subclasses . . . . . 27 203-211
3. Some analogies between the class of infinitely divisible distributions and the class  $\mathcal{L}$  of distributions . . . . . 22 197-209

**Kwapień, S.**

1. Some remarks on  $(p, q)$ -absolutely summing operators in  $l_p$ -spaces . . . . . 29 327-337

**Lachterman, S.**

1. Exponentially convex functions on a cone in a Lie group . . . . . 27 105-139

**Lardy, L. J.**

1.  $L^1(a, b)$  with order convolution . . . . . 27 1-8

**Lasher, S.**

1. On Peano derivatives in  $L^p(E_n)$  . . . . . 29 195-201

**Leeuw de, K.**

1. Banach spaces of Lipschitz functions . . . . . 21 55-66

**Leindler, L.**

1. Nicht verbesserbare Strukturbedingungen . . . . . 26 155-163
2. Über unbedingte Konvergenz der Orthogonalreihen mit strukturellen Bedingungen . . . . . 23 113-117

**Leland, K. O.**

1. Characterizations of solutions of  $\Delta f = cf$  . . . . . 29 125-132

**Leżański, T.**

1. Sur les solutions généralisées des équations quasi-linéaires . . . . . 29 133-142
2. Über die Methode des „schnellsten Falles“ für das Minimumproblem von Funktionalen in Hilbertschen Räumen . . . . . 28 183-192

**Lindberg, J. A.**

1. (and F. T. Birtel) A Liouville algebra of non-entire functions . . . . . 25 27-31

**Lindenstrauss, J.**

1. (and A. Pełczyński) Absolutely summing operators in  $\mathcal{L}_p$ -spaces and their applications . . . . . 29 275-326

- Littman, W.**
1. (and C. McCarthy and N. Rivière)  $L^p$ -multiplier theorems . . . . . 30 193-217
  2. (and C. McCarthy and N. Rivière) The non-existence of  $L^p$ -estimates for certain translation-invariant operators . . . . . 30 219-229
- Malanowski, K.**
1. On the time optimal control in the case of non-uniqueness . . . . . 27 147-167
- Marcinkowska, H.**
1. On the differentiability of weak solutions of certain non-elliptic equations . . . . . 22 91-107
  2. On the differentiability of weak solutions of certain non-elliptic equations, II . . . . . 23 85-103
- Martineau, A.**
1. Sur des théorèmes de S. Banach et de L. Schwartz concernant le graphe fermé . . . . . 30 43-51
- Máté, L.**
1. The Arens product and multiplier operators . . . . . 28 227-234
- Matuszewska, W.**
1. (and W. Orlicz) A note on the theory of normed spaces of  $\varphi$ -integrable functions . . . . . 21 107-115
  2. A remark on my paper "Regularly increasing functions in connection with the theory of  $L^{*\varphi}$ -spaces" . . . . . 25 265-269
  3. On a generalization of regularly increasing functions . . . . . 24 271-279
  4. (and W. Orlicz) On some classes of functions with regard to their orders of growth . . . . . 26 11-24
  5. Regularly increasing functions in connection with the theory of  $L^{*\varphi}$ -spaces . . . . . 21 317-344
- Maurin, L. und Maurin, K.**
1. Spektraltheorie separierbarer Operatoren . . . . . 23 1-29
  2. Universelle umhüllende Algebra einer lokal kompakten Gruppe und ihre selbstadjungierte Darstellungen. Anwendungen . . . . . 24 227-243
- McCarthy, C.**
1. (and W. Littman and N. Rivière)  $L^p$ -multiplier theorems . . . . . 30 193-217

2. (and W. Littman and N. Rivière) The non-existence of  $L^p$ -estimates for certain translation-invariant operators . . . . . 30 219-229
- McWilliams, R. D.**
1. (and R. J. Fleming and J. R. Retherford) On  $w^*$ -sequential convergence, type  $P^*$  bases, and reflexivity . . . . . 25 325-332
- Méla, J. F.**
1. Sur les ensembles d'interpolation de C. Ryll-Nardzewski et de S. Hartman . . . . . 29 167-193
- Meyer, Y.**
1. Le spectre de Wiener . . . . . 27 189-201
  2. Spectres des mesures et mesures absolument continues . . . . . 30 87-99
- Mikusiński, J.**
1. Analytic functions of polynomial growth . . . . . 22 7-13
  2. An approximation theorem and its applications in operational calculus . . . . . 27 141-145
  3. Convolution approximation and shift approximation . . . . . 27 1-8
  4. Criteria of the existence and of the associativity of the product of distributions . . . . . 21 253-259
  5. Germs and their Operational Calculus . . . . . 26 279-289
  6. Sequential theory of the convolution of distributions . . . . . 29 151-160
  7. (et W. Kierat) Sur un théorème de calcul opérationnel d'intervalle fini . . . . . 25 93-96
- Mitiagin, B.**
1. (and S. Rolewicz and W. Żelazko) Entire functions in  $B_0$ -algebras . . . . . 21 291-306
- Mlak, W.**
1. On semi-groups of contractions in Hilbert spaces . . . . . 26 255-264
  2. (and C. Foiaş) The extended spectrum of completely non-unitary contractions and the spectral mapping theorem . . . . . 26 231-237
- Mrówka, S.**
1. On the form of pointwise continuous positive functionals and isomorphisms of function spaces . . . . . 21 1-14
- Muckenhoupt, B.**
1. The norm of a discrete singular transform . . . . . 25 97-102

- Musielak, J.**
1. (and W. Orlicz) On modular spaces of strongly summable sequences . . . . . 22 127-146
  2. On some spaces of functions and distributions (I) . . . . . 21 195-202
  3. On some spaces of functions and distributions (II) . . . . . 21 237-244
- Namioka, I.**
1. On certain actions of semi-groups on  $L$ -spaces . . . . . 29 63-77
- Neugebauer, C. J.**
1. Smoothness and differentiability in  $L_p$  . . . . . 25 81-91
- Norris, D. O.**
1. A topology for Mikusiński operators . . . . . 24 245-255
- O'Neil, R.**
1. (and G. Weiss) The Hilbert transform and rearrangement of functions . . . . . 23 189-198
- Nishiura, T.**
1. (and D. Waterman) Reflexivity and summability . . . . . 23 53-57
- Okikiolu, G. O.**
1. On maximal functions of fractional order . . . . . 30 259-271
- Ogrodzka, Z.**
1. On simultaneous extension of infinitely differentiable functions . . . . . 28 193-207
- Orlicz, W.**
1. Absolute continuity of vector-valued finitely additive set functions, I . . . . . 30 121-133
  2. (and W. Matuszewska) A note on the theory of  $s$ -normed spaces of  $\varphi$ -integrable functions . . . . . 21 107-115
  3. (and J. Musielak) On modular spaces of strongly summable sequences . . . . . 22 127-146
  4. (and W. Matuszewska) On some classes of functions with regard to their orders of growth . . . . . 26 11-24
  5. On some classes of modular spaces . . . . . 26 165-192
  6. On some spaces of strongly summable sequences . . . . . 22 331-336
- Peetre, J.**
1. Estimates for eigenfunctions . . . . . 28 169-182
- Pelczyński, A.**
1. A characterization of Hilbert-Schmidt operators . . . . . 28 355-360

2. A note on the paper of I. Singer "Basic sequences and reflexivity of Banach spaces" . . . . . 21 371-374
  3. A remark on the preceding paper of I. Singer . . . . . 26 115-116
  4. (and I. M. Kadec) Bases, lacunary sequences and complemented subspaces in the spaces  $L_p$  . . . . . 21 161-176
  5. On Banach spaces containing  $L_1(\mu)$  . . . . . 30 231-246
  6. On simultaneous extension of continuous functions (A generalization of theorems of Rudin-Carleson and Bishop) . . . . . 24 285-304
  7. (и М. И. Кадец) Базисные последовательности, биортогональные системы и нормирующие множества в пространствах Банаха и Фреше . . . . . 25 297-323
  8. (and I. Singer) On non-equivalent bases and conditional bases in Banach spaces . . . . . 25 5-25
  9. Supplement to my paper "On simultaneous extension of continuous functions" . . . . . 25 157-161
  10. (and J. Lindenstrauss) Absolutely summing operators in  $\mathcal{L}_p$ -spaces and their applications . . . . . 29 275-326
- Phelps, R. P.**
1. A problem of Hewitt on restrictions of multiplicative linear functionals . . . . . 25 1-3
- Pietsch, A.**
1. Absolut  $p$ -summierende Abbildungen in normierten Räumen . . . . . 28 333-353
  2. ( $F$ )-Räume mit absoluter Basis . . . . . 26 225-230
  3. Zur Fredholmschen Theorie in lokalkonvexen Räumen . . . . . 22 161-179
- Przeworska-Rolewicz, D.**
1. Equations avec opérations algébriques . . . . . 22 337-367
  2. (and S. Rolewicz) On operators preserving a conjugate space . . . . . 25 245-249
  3. (and S. Rolewicz) On operators with a finite  $d$ -characteristic . . . . . 24 257-270
  4. (and S. Rolewicz) On integrals of functions with values in a complete linear metric space . . . . . 26 121-131
  5. (and S. Rolewicz) On quasi-Fredholm ideals . . . . . 26 67-71
  6. Sur les équations avec opérations presque algébriques . . . . . 25 163-180
  7. Sur les opérations satisfaisant à une identité polynomiale . . . . . 22 43-58
