

The Institute Mathematics of the Polish Academy of Sciences
announces an open call
for a research position for a young mathematician
financed by the National Science Center (Poland) Sonata Bis project
"The interplay of ergodic theory and topological dynamics"
(principal investigator: Dr. Yonatan Gutman)

for a period of 3 years at its branch in Warsaw, Poland, beginning of funding from January 1st 2018, for a candidate from Poland or from abroad who at the start of the project is either a full-time or part-time master's student or a PhD student.

The scientific scholarship will be 3000 PLN per month and it will not be allowed to receive other scholarships at the same time. A candidate from outside Warsaw may receive up to 640 PLN per month towards accommodation renting costs. The candidate is expected to:

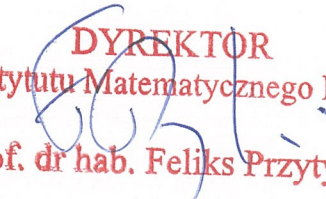

1. Collaborate with the principal investigator and conduct research in topics related to the project (details are available by e-mail from the principal investigator).
2. Stay permanently or temporarily (for the period of employment) in Warsaw, Poland.

Every year the relevant committee assesses the candidate's scientific progress and continuation of the payment of the scholarship is contingent on positive assessment.

Applications including a research interests statement, curriculum vitae, two letters of recommendation and consent to processing of personal data, should be sent before December 1st, 2017 by e-mail to gutman@impan.pl (subject: STYPENDIUM SONATA BIS).

Additional information is available via e-mail from the principal investigator at gutman@impan.pl.

The decision will be made on December 15th, 2017 and the candidates will be informed of the results by e-mail.

DYREKTOR
Instytutu Matematycznego PAN
Prof. dr hab. Feliks Przytycki
