

Dear Colleagues,

this is the call for abstracts of your contributions to the proceedings of the conference “**Geometry of Jets and Fields**” .

According to declarations during the conference, there are 17 invited speakers and 3 authors of posters and short talks interested in submitting their contributions. However, anyone can still make the final decision and send an abstract.

The deadline for sending abstract is set to **June 22, 2015**. The length of an abstract should not exceed half of a page.

The proceedings will appear as a volume of the **Banach Center Publications**. The project of the volume, together with all the abstracts, will be sent to the Editorial Board of the series. The members of the Organizing Committee of the conference will act as editors of the volume.

The general idea of the volume is to share with the community the content of the excellent talks that we heard during the conference. The authors are therefore asked to find a suitable way of transforming their slides and notes into a paper (extended reference lists would be welcome) and submit a source file in Latex using the **bcp** style. The latter can be downloaded from the web page of the Banach Center Publications: <<http://journals.impan.pl/bc/for.html>>.

According to the rules of the publisher, each volume should not exceed 350 pages. We preliminarily count that the invited speakers can have about 18 pages, and the authors of posters and shorter talks 8 pages to their disposal. If all of the speakers and poster authors decide to contribute, then the upper bounds will be 12 and 7, respectively. The final number of pages per contribution will be decided after we get all the abstracts.

The deadline for sending contributions in the final form is planned for the **end of October**. The precise date will be the subject of further announcement.

All the contributions will be sent to referees for evaluation. Authors are expected to proofread their contributions before publication. If desired, 25 free offprints of the article or the final pdf file will be sent to the corresponding author. Additional offprints can be ordered when sending the proof corrections. The description of the whole process can be found on the page <http://www.impan.pl/BC/publ.html>.

In case of any questions please do not hesitate to contact me or other members of the Organizing Committee.

With best regards,

Katarzyna Grabowska
